INTERNSHIP EXPERIENCE

Mern stack

short-tern-internship

JUN 2024 – JULY 2024 Remote

- Worked on A MERN stack internship which typically involves working with a combination of technologies that make up the MERN stack: MongoDB, Express.js, React.js, and Node.js. These technologies are widely used to develop full-stack web applications, where MongoDB is used as the database, Express.js and Node.js handle the server-side logic, and React.js is used for the front-end user interface.

MongoDB

Express.js

React.js

Node.js

Zscaler Zero Trust Associate Certification

Zscaler Academy

Remote

- "Achieved Zscaler Zero Trust Associate certification, demonstrating expertise in implementing Zero Trust security principles and leveraging Zscaler's cloud-based solutions for secure internet access, private application access, and comprehensive threat protection."

EDUCATION

B.Tech in Computer Science

Sasi Institute of Technology & Engineering CGPA: 8.94

Dec 2021 – ongoing

Intermediate, MPC

Narayana Junior College CGPA: 9.7

2019 – 2021

SSC

Manasa E.M High School CGPA: 9.7

2019

CERTIFICATIONS

- Linux Fundamentals certification from RedHat Academy
- AWS Cloud Foundations certification from AWS Academy
- HTML5 and CSS Fundamentals certification from edX
- Data Structures and Algorithms using Python certification from Infosys

PROJECTS

Amazon Clone

- The Amazon clone project is a comprehensive e-commerce web application designed to replicate the core functionalities of the Amazon marketplace, including product listings, shopping cart, user authentication, and payment processing.
